

MyCSO Services

Managing Information Risk

MY CHIEF SECURITY OFFICER (MyCSO) SERVICES

- **MyCSO ADVISOR**
A telephone and email support offering with access to experts in Information Security, Business Continuity, and Incident Response.
- **MyCSO ANALYST**
Provides customized security event management, log management, and security event correlation by fully trained and certified security analysts from our SAS 70 certified SOC.
- **MyCSO ASSURANCE**
A fully customized program that tackles the strategic objectives and tactical requirements of an information assurance program. MyCSO Assurance specifically addresses assessment, governance, awareness training, policies and procedures, incident response, and day to day security operations management.

MyCSO LETS YOU GET BACK TO YOUR CORE BUSINESS

MyCSO provides cost-effective information risk management services that focus on data security, regulatory compliance, business continuity, and incident response events.

Executives realize it is a corporate responsibility to reduce their company's information risk, and not doing so could have a profound impact on their business. Many struggle with the added cost of providing in-house capabilities and the time dedicated to these efforts that take away from accomplishing business goals.

Our MyCSO outsourced risk management service options can reduce your operating expenses while providing the resources

needed to manage your company's information risk more proactively, rather than reactively.

MyCSO services gives your business access to world-class information risk management specialists and services to help reduce your risk of data exposure and keep your business functioning at all times.

Corporate liability and information risk management go hand in hand. Let NCX Group be your risk management resource to help reduce your exposures, meet your compliance requirements, lower your operational expenses, and get you back to growing your business.
